

# Since your concussion/mild traumatic brain injury...are you?

- More Forgetful
- Easily distracted
- Have trouble doing more than one thing at a time

*If you answered yes to any of these questions you may be interested in our study.*

*The purpose of this research study is to evaluate the potential effectiveness of computerized brain exercises in individuals who have had a concussion/mild brain injury. Participants will receive free neuropsychological screening and computerized brain exercises. No medications will be given.*
