

Jason Fries

President and CEO
3D-Forensic, Inc.

A leading proponent of the use of forensic animations, Jason Fries helped develop the first computer-generated animation accepted in Santa Clara Superior Court, along with the first forensic animation admitted into the Superior Court of Hawaii. Mr. Fries also helped create the first forensic animations developed using laser scanning data in trials in California and Hawaii. He helped write articles on accident and crime reconstruction and simulation for Forensic Magazine, Claims Magazine, the California District Attorneys Association Quarterly Journal and Right of Way Magazine.

Mr. Fries has given lectures to, and trained members of, many organizations including the Highway Safety Transportation Board, CARRS, CLE International, National Association of Professional Engineers, Forensic Expert Witness Association, Society of Forensic Engineers and Scientists, International Right of Way Association, UC Hastings School of Law and the Transportation Research Board Human Factors Workshop.

Mr. Fries has maintained a 100% admissibility record for courtroom submissions throughout the country and all over the world, working on over 1,000 cases with more than 20 years of experience at the highest levels of accuracy and forensic analysis. He has been qualified as an expert in court in the field of forensic animation, line of sight analysis, video reconstruction, ballistic analysis, photogrammetry, night-time video analysis and human factors.
